

## Creativity in South Africa

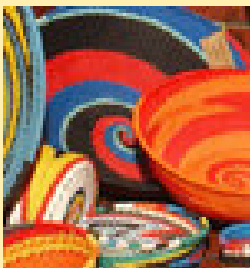

A remarkable range of arts and crafts are produced by South African people.

Painted ostrich eggs

Traditional mediums are used as well as new ones developed by local artists. You will find creative objects on many street corners of South Africa.

Standard materials such as beads, grass, leather, fabric and clay are used. Unconventional pieces are made using telephone wire, plastic bags, petrol cans, and bottle tops.

Even food labels are used to create brightly colored objects.
